

About Locker Wire Mesh

Originally established in Warrington, United Kingdom in 1878, Locker has been at the leading edge of wire mesh production for more than 120 years.

The quality workmanship and pioneering spirit that defined the company then, still hold true today.

We combine cutting edge technology with unsurpassed product knowledge to build close partnerships with customers, often working alongside them to develop new and innovative wire mesh products and solutions.

Our resources and applications experience have enabled us to develop solutions for many customers.

Architectural Wire Mesh

With our team of in-house design engineers operating on AutoCAD and our fabricating and installation resource we can offer a complete architectural wire mesh design and fix package. For more a more detailed understanding of the patterns which are available, past project experiences or indeed the ever increasing range of applications please see our website.

Wire Mesh Products

We maintain a comprehensive stock of stainless steel woven wire mesh, and can also supply plain, galvanised and other alloys in a variety of roll widths and weave types. Choose from standard wire mesh, PACO precision woven wire, dutch weave, insect screening, pressed components, fabrications, process screens and Locker Rotex spares.

Heat Shielding

Locker Radiant Heat and Weather Shield Cladding Panels are designed for ease of installation and are maintenance free. Types include "Ladder" shield, "Mini" type shields and "Flare Deck Grid Flooring".

Clarifier Systems

The Locker Clarifier System has been designed to reduce the levels of S.S. (suspended solids) and subsequently B.O.D. (biological oxygen demand) in the final effluent produced by sewage and waste water treatment works.

Wire Mesh for Hobbies and Crafts

Locker have a business division specialising in smaller quantities of mesh for artists, hobbyists, modelers and home improvers. Visit The Mesh Company website (www.themeshcompany.com) for more information.
