

## Locker Wire Mesh Products

The Locker Group of companies are world-renowned specialists in the manufacture of woven wire mesh and wire mesh related products.

We maintain a comprehensive stock of stainless steel woven wire mesh, and can also supply plain, galvanised and other alloys in a variety of roll widths and weave types.

All our wire mesh is manufactured in accordance with International Standards.

Wire mesh cloth can be supplied on the roll, 'as cut' from the roll or in flat panels of varying sizes and shapes to suit your requirements.

Standard roll lengths are 30.5 metres x 1220mm wide. A limited number of specifications are available up to 2000mm. For further information see the Buyers Guide and FAQ.

Experienced engineering staff based at our Design and Technical Centre are also available to offer advice and guidance in the selection of the most appropriate material for given applications.

### Standard wire mesh

Wire mesh stock specifications.

### PACO precision woven wire

Precision woven mesh for a broad range of high tech applications including RFI, EMI, EMC shielding, and screen printing onto ceramics and glass.

### Dutch weave

Woven wire cloth where the diameter of the warp and weft wires, and the mesh count in the warp and weft directions, are different.

### Insect screening

An extensive range of mesh for screening windows, doors and other ventilation areas in homes, offices, hospitals, restaurants etc.
